SUMMARY

Computer Science undergraduate focused on **full-stack development** with strong foundations in Data Structures & Algorithms, DBMS, Computer Networks, and system design. Experienced in building and deploying full-stack applications using React.js, Node.js, Express.js, MongoDB, Redis, REST APIs, and AI/LLM integrations. Solved 400+ LeetCode problems using C++ with a strong focus on problem solving and backend engineering.

TECHNICAL SKILLS

Languages: C++, JavaScript

Frontend: React.js, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

Databases: MongoDB, MySQL, Redis

Developer Tools: Git, GitHub, Postman

Core CS: Data Structures & Algorithms, OOPS, DBMS, Computer Networks, System Design

PROJECTS

InterviewReady – AI-Powered Interview Preparation Platform

Live | GitHub

React.js, Node.js, Express.js, MongoDB, Redis, Gemini API, Puppeteer

- Built a full-stack **AI-powered interview preparation platform** that analyzes resumes and generates personalized interview reports using React.js, Node.js, Express.js, and Gemini API.
- Developed an **AI resume formatter** that processes uploaded PDF resumes, extracts structured content, and generates ATS-friendly resume layouts using automated PDF generation with Puppeteer.
- Implemented **JWT-based authentication with HTTP-only cookies** and protected REST APIs for secure user sessions and interview report management.
- Integrated **Redis-based rate limiting and caching** to control API usage, reduce redundant operations, and protect AI-powered backend endpoints from excessive requests.

Project Pulse – Multi-Tenant Issue Tracking Platform

Live | GitHub

React.js, Node.js, Express.js, MongoDB, Redis, Socket.IO, JWT

- Built a full-stack **multi-tenant issue tracking platform** with isolated organization workspaces and modular **REST APIs** using React.js, Node.js, Express.js, and MongoDB.
- Implemented **JWT authentication and role-based access control (RBAC)** to secure backend API endpoints and enforce organization-level user permissions.
- Integrated **Redis caching** for frequently accessed database queries to improve API response performance and reduce repeated database operations.
- Engineered **real-time bidirectional communication using Socket.IO** to synchronize issue and status updates across connected user sessions.

SafeNet – AI Content Moderation System

Live | GitHub

React.js, Node.js, Express.js, Groq API, Vite, Tailwind CSS

- Built a full-stack **AI-powered multimodal content moderation system** for analyzing text, image, and audio content and providing real-time moderation results.
- Integrated the **Groq API** with modular **Express.js backend workflows** for automated AI-based content classification and moderation.
- Developed a responsive **React.js drag-and-drop interface** with file upload handling, validation, and real-time moderation feedback.

ACHIEVEMENTS & CODING PROFILE

- **Smart India Hackathon (SIH) 2025:** Qualified for the External Round among 200+ competing teams.
- **LeetCode:** Solved 400+ Data Structures & Algorithms problems using C++.

EDUCATION

Galgotias College of Engineering and Technology

B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 7.7

Sep 2023 – May 2027

Greater Noida, U.P.

Panchsheel Balak Inter College

Class XII: 90.2% Class X: 96.8%

2020 – 2023

Noida, U.P.
