SUMMARY

Software Engineering undergraduate with strong foundations in Data Structures & Algorithms, DBMS, Computer Networks, and backend development. Experienced in building full-stack applications using React.js, Node.js, Express.js, MongoDB, Redis, and REST APIs. Solved 400+ LeetCode problems using C++.

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL

Frontend: React.js, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

Databases: MongoDB, MySQL, Redis

Developer Tools: Git, GitHub, Postman, Vercel, Netlify, Render

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks, System Design

PROJECTS

Project Pulse – Multi-Tenant Issue Tracking Platform

Live | GitHub

React.js, Node.js, Express.js, MongoDB, Redis, Socket.IO, JWT

- Built a full-stack **multi-tenant issue tracking platform** with isolated organization workspaces and modular **REST APIs** using React.js, Node.js, Express.js, and MongoDB.
- Implemented **JWT authentication and role-based access control (RBAC)** to secure backend API endpoints and enforce organization-level user permissions.
- Integrated **Redis caching** for frequently accessed database queries to improve API response performance and reduce repeated database operations.
- Engineered **real-time bidirectional communication using Socket.IO** to synchronize issue and status updates across connected user sessions.

SafeNet – AI Content Moderation System

Live | GitHub

React.js, Node.js, Express.js, Groq API, Vite, Tailwind CSS

- Built a full-stack **AI-powered multimodal content moderation system** for analyzing text, image, and audio content and providing real-time moderation results.
- Integrated the **Groq API** with modular **Express.js backend workflows** for automated AI-based content classification and moderation.
- Developed a responsive **React.js drag-and-drop interface** with file upload handling, validation, and real-time moderation feedback.

Foodie Fiesta – Recipe Discovery Web Application

Live | GitHub

JavaScript, React.js, REST APIs, HTML5, CSS3

- Developed a responsive **React.js** recipe discovery application integrating the **Spoonacular REST API** to dynamically retrieve and display recipe data.
- Implemented **debounced search, client-side filtering, and caching** to minimize redundant API requests and improve search responsiveness.
- Designed **mobile-first responsive layouts** using CSS Grid and Flexbox for consistent usability across desktop and mobile devices.

ACHIEVEMENTS & CODING PROFILE

- Smart India Hackathon (SIH) 2025:** Qualified for the External Round among 200+ competing teams.
- LeetCode:** Solved 400+ Data Structures & Algorithms problems using C++.

EDUCATION

Galgotias College of Engineering and Technology

B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 7.7

Sep 2023 – May 2027

Greater Noida, U.P.

Panchsheel Balak Inter College

Class XII: 90.2% Class X: 96.8%

2020 – 2023

Noida, U.P.
